Reference

August 2011 г.

The company Forma-Futuro significantly helped us with improvement of the company culture. On the base of employees satisfactory survey the consultants prepared and moderated two sessions (one with selected employees, the second with managers) within which several proposals for improvement has been discovered and proposed. The sessions were moderated in very professional and creative way. The feedback from the participants was only possitive. We use Forma-Futuro consultants and trainers for specific trainings which we construct together with them on the base of real situations in the company and its real needs. It means that each training is an original. All trainings have been done in very professional way and with high acceptance of all participants. We wish Forma-Futuro successful future, many clients and many interesting tasks.

Eva Znamenackova
